BLOCK CHAIN

https://youtu.be/IK8ktmqNcpY

- La información está distribuida en todos los nodos de la red.
- Todos los nodos son iguales, Peer-to-peer
- Todos los nodos tienen una copia del libro de registro

Blockchain

fuente: https://www.xataka.com/especiales/que-es-blockchain-la-explicacion-definitiva-para-la-tecnologia-mas-de-moda

Block Chain

- Block Chain es como un libro de contabilidad compartido y distribuido que facilita el proceso de registrar transacciones y rastrear activos en una red comercial.
- Un activo puede ser tangible: una casa, un automóvil, efectivo, tierra o propiedad intelectual intangible, como patentes, derechos de autor o marcas. Prácticamente todo lo que tiene valor puede rastrearse e intercambiarse en una red blockchain, lo que reduce el riesgo y reduce los costos para todos los involucrados.

Video Demo

Como se mantiene la integridad y seguridad de los nodos?

Video: Hash Blockchain Demo: https://anders.com/blockchain/
